PROFILE SUMMARY

Full Stack Software Engineer with hands-on experience building enterprise-grade applications. Strong foundation in backend engineering, RESTful API design, and scalable system development. Experienced in applying object-oriented principles, design patterns, and clean coding practices.

WORK EXPERIENCE

IronOne Technologies Pvt Ltd

On Site

Software Engineer Intern | Atrad – Wealth Management Platform

Nov 2025 – Present

- Developed and maintained backend services for an enterprise wealth management platform using Java and Quarkus following clean architecture and modular design principles.
- Designed and implemented RESTful APIs focusing on scalability, maintainability, and secure data handling.
- Optimized SQL queries and improved API responsiveness by reducing unnecessary data retrieval and enhancing query efficiency.
- Integrated Keycloak-based authentication and authorization for secure user access management and role-based access control.
- Built responsive frontend components using React.js and TypeScript integrated with backend services.
- Managed database schema versioning and migrations using Flyway to support reliable and maintainable deployments.
- Collaborated with cross-functional teams in an Agile (Scrum) environment to deliver production-ready features and resolve application issues.
- Participated in code reviews, debugging, and technical discussions to improve code quality, maintainability, and development standards.

EDUCATION

University of Colombo School of Computing (UCSC)

Sri Lanka

BSc in Computer Science

2023 – 2026

Embilipitiya President College

Sri Lanka

GCE Advanced Level (Physical Science) | Combined Mathematics – A, Chemistry – A, Physics – A

2021

PROJECTS

Healthcare Microservices Platform

2026

- Designed a microservices-based healthcare platform with independent services for patient management, billing, authentication, and analytics, using event-driven communication via Apache Kafka.
- Implemented secure authentication and authorization using Spring Security, JWT, and API Gateway-based centralized request handling, containerized and deployed on AWS using Docker.
- **Technologies:** Spring Boot, Kafka, Docker, AWS, Spring Security, JWT

Lora Chemicals - Inventory Management System

2025

- Developed a full-stack inventory and order management system for stock tracking, order processing, and business workflow management backed by PostgreSQL.
- Implemented role-based access control (RBAC) supporting administrative, sales, and warehouse management operations.
- **Technologies:** Spring Boot, React, PostgreSQL

Learning Management System

2025

- Developed a project supporting course, subject, and topic management with student enrollment workflows and granular per-topic progress tracking aggregated to course and overall levels.
- Integrated Keycloak OIDC authentication with role-based access control across Admin, Lecturer, and Student roles, with automatic user provisioning into Keycloak from the backend.
- **Technologies:** Quarkus, Java , PostgreSQL, Keycloak

Vito's Kitchen – Food Delivery Application

2024

- Built a full-stack food delivery platform with JWT-based authentication, password hashing, and persistent per-user shopping cart state stored in MongoDB.
- Integrated Stripe Checkout for secure payment processing and built a React admin dashboard for menu management and end-to-end order lifecycle tracking.
- **Technologies:** Node.js, Express.js, MongoDB, React, Stripe, JWT

FarmLink – Agricultural Marketplace Platform

2024

- Developed a web-based marketplace connecting farmers, buyers, consultants, and delivery partners through centralized MVC-based workflows for maintainability and separation of concerns.
- Integrated Google Maps API for location-based services and PayHere payment gateway for secure online transactions.
- **Technologies:** PHP, MySQL, JavaScript, Google Maps API, PayHere

TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript, Python
- **Backend:** Spring Boot, Quarkus, REST APIs, Microservices, Kafka, SQL
- **Databases:** PostgreSQL, MySQL
- **Frontend:** React.js, HTML, CSS
- **Cloud & DevOps:** AWS, Docker, CI/CD (GitHub Actions)
- **Tools & Testing:** Git, Maven, Postman, Linux, JUnit, Keycloak
- **Concepts:** OOP, Data Structures, Design Patterns, Clean Architecture, Agile (Scrum)

SOFT SKILLS

- Communication, Teamwork, Leadership, Adaptability, Time Management, Problem Solving, Critical Thinking

CERTIFICATIONS

AWS Certified Cloud Practitioner - Udemy
Docker for Beginners – KodeKloud

ACTIVITIES

CompSoc: Member of the Web Team.
IEEE Student Branch: Member.
