PROFILE SUMMARY

Full Stack Software Engineer with professional experience building enterprise-grade applications in a FinTech domain. Strong foundation in backend engineering, RESTful API design, and scalable system development. Experienced in applying object-oriented principles, design patterns, and clean coding practices.

WORK EXPERIENCE

IronOne Technologies Pvt Ltd

Software Engineer | Atrac – Wealth Management Platform

On Site

Nov 2025 – Present

- Developed and maintained backend services for an enterprise wealth management platform using Java and Quarkus following clean architecture and modular design principles.
- Designed and implemented RESTful APIs focusing on scalability, maintainability, and secure data handling.
- Optimized SQL queries and improved API responsiveness by reducing unnecessary data retrieval and enhancing query efficiency by 30%.
- Integrated Keycloak-based authentication and authorization for secure user access management and role-based access control.
- Built responsive frontend components using React.js and TypeScript integrated with backend services.
- Managed database schema versioning and migrations using Flyway to support reliable and maintainable deployments.
- Collaborated with cross-functional teams in an Agile (Scrum) environment to deliver production-ready features and resolve application issues.
- Participated in code reviews, debugging, and technical discussions to improve code quality, maintainability, and development standards.

EDUCATION

University of Colombo School of Computing (UCSC)

BSc in Computer Science | GPA: 3.1/4.0

Sri Lanka

2023 – 2026

Embilipitiya President College

GCE Advanced Level (Physical Science) | Combined Mathematics – A, Chemistry – A, Physics – A

Sri Lanka

2021

PROJECTS

Healthcare Microservices Platform

2026

- Architected and developed a microservices-based healthcare platform with independent services for patient management, billing, authentication, and analytics processing.
- Implemented event-driven asynchronous communication between services using Apache Kafka to improve scalability and service decoupling.
- Designed secure authentication and authorization mechanisms using Spring Security, JWT, and API Gateway-based centralized request handling.
- Containerized and deployed microservices using Docker and AWS cloud infrastructure.
- Collaborated on backend service integration, API communication, and modular service design following microservices architecture principles.
- **Technologies:** Spring Boot, Kafka, Docker, AWS, Spring Security, JWT

Inventory Management System

2025

- Developed a full-stack inventory and order management system to streamline product management, stock tracking, and operational workflows.
- Built scalable RESTful APIs using Spring Boot for inventory control, order processing, reporting, and business workflow management.
- Designed and optimized relational database structures using PostgreSQL to support efficient data retrieval and transactional consistency.
- Implemented role-based access control (RBAC) supporting administrative, sales, and warehouse management operations.
- Built responsive frontend interfaces using React to improve usability and real-time operational interaction.
- **Technologies: Spring Boot, React, PostgreSQL**

FarmLink – Agricultural Marketplace Platform

2024

- Developed a web-based agricultural marketplace platform connecting farmers, buyers, consultants, and delivery partners through centralized workflows.
- Designed and implemented modular MVC-based architecture to improve maintainability, scalability, and separation of concerns.
- Built core business features including expert consultations, shopping cart management, order processing, delivery verification, and feedback management.
- Integrated Google Maps API for location-based services and PayHere payment gateway for secure online transactions and order processing.
- Collaborated on frontend-backend integration, database design, and feature implementation within a team-based development environment.
- **Technologies: PHP, MySQL, JavaScript, Google Maps API, PayHere**

TECHNICAL SKILLS

- **Languages:** Java, SQL, JavaScript, TypeScript, Python
- **Backend:** Spring Boot, Quarkus, REST APIs, Microservices, Kafka
- **Databases:** PostgreSQL, MySQL
- **Frontend:** React.js, HTML, CSS
- **Cloud & DevOps:** AWS, Docker, CI/CD (GitHub Actions)
- **Tools & Testing:** Git, Maven, Postman, Linux, JUnit
- **Concepts:** OOP, Data Structures, Design Patterns, Clean Architecture, Agile (Scrum)

SOFT SKILLS

- **Core :** Fast Learning, Communication, Collaboration, Leadership, Adaptability, Time Management, Problem Solving, Critical Thinking, Ownership, Attention to Detail, Stakeholder Management, Requirement Gathering, Teamwork

CERTIFICATIONS

AWS Certified Cloud Practitioner - Udemy
Docker for Beginners – KodeKloud

ACTIVITIES

CompSoc: Member of the Web Team.
IEEE Student Branch: Member.
